

Erratum for Kai, S., Almeda, M.V., Baker, R.S., Heffernan, C., Heffernan, N. (2018) Decision Tree Modeling of Wheel-Spinning and Productive Persistence in Skill Builders. *Journal of Educational Data Mining*, 10 (1), 36-71.

In the original published version of the article, it was stated that student-level cross-validation was used. However, upon later re-analysis by another member of our laboratory, Yeyu Wang, it was determined that cross-validation had been inadvertently conducted at the level of student-skill pairs. When the overall model was re-validated using student-level cross-validation, the overall model's goodness dropped by just under 0.05 (AUC ROC). The paper has been corrected to clarify what analysis was conducted, and present AUC ROC for both cross-validation approaches.
